

**CIM Users Group
North American Meeting
Host Information Sheet
November 11-14, 2014
Location: Orange County, California**

Host Utility Information

The CIM is an international standard now globally accepted for modelling the information exchanges required in electric utilities. The 2014 North American CIM Users Group Meeting is looking for some great hosts to allow utilities to come together and discuss developing standards-based enterprise information architectures and integration frameworks to meet the business challenges of North American utilities. With the focus on Smart Grid interoperability and distribution applications this is your opportunity to support the collaboration of CIM across utilities.

As a Host you are invited to participate in the entirety of the conference, spending 3 and half days with attendees sharing your experiences.

As a Utility Host you would receive:

- **One conference pass (an \$800 value) **additional passes at a discounted rate**
- **Logo recognition on conference website and onsite**
- **Participation on the planning committee for the conference**

As a Utility Host we ask you to provide:

- **One speaker from your utility to provide a keynote address or other presentation**
- **One representative from your utility to participate in the weekly planning calls for the North American Meeting**

There is no cost for our Host Utilities! This is your opportunity to show your support of the CIM discussion. Confirm your host spot by emailing Brittany Cameron at brittany@cimug.org or calling 720.369.8580
